DETAILED ACTION

A final rejection was mailed in this application on 5/15/02. Applicant submitted an after final amendment on 9/19/02. No advisory action was mailed to applicant and the application was suspended by the Office on 10/21/02. Applicant filed a Notice of Appeal on 11/22/02. Examination in this application is hereby resumed. Finality of the prior Office action mailed 5/15/02 is hereby withdrawn.

The examiner has entered the amendment filed 9/19/02. Claims 4-33 have been cancelled. Claims 34-45 have been newly introduced. Claims 1-3 and 34-45 are pending. The record reflects that only SEQ ID NOS: 3 and 4 for murine promyostatin were under examination due to a species election. However, as no art rejections are presently of record, the species election is withdrawn and claims 1-3 and 34-45 have been fully examined.

Specification

Applicant is requested to update the status of the co-pending applications referenced in the specification.

Claim Objections

Applicant is advised that should claim 3 be found allowable, claims 36 and 42 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Double Patenting

Claims 1-3 and 34-43 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,827,733.

This rejection is maintained for reasons of record as applied to claims 1-3. It is noted that a terminal disclaimer was filed 9/12/02. This terminal disclaimer is in the process of being evaluated.

Claim Rejections - 35 USC § 112

Claims 1, 34-35, 38, and 40-41 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

This rejection is maintained for reasons of record as applied to claims 1-3, 8-12, and 14-17 in the final rejection and applied to new claims 34-35, 38, and 40-41 for the same reasons. In the absence of a particular sequence to reference, amino acid position ranges have no meaning.

Claim 1, 34-35, 38, and 40-41 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the particular sequences disclosed, does not reasonably provide enablement for all sequences embraced by the claims. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

Art Unit: 1647

This rejection is maintained for reasons of record as applied to claims 1-3, 8-12, and 14-17 in the final rejection and advisory action and applied to new claims 34-35, 38, and 40-41 for the same reasons.
